About us

Since 2002, Detectaplast® has been the benchmark in detectable plasters and first aid materials for the food industry, hospitality sector, and commercial kitchens.

Building on this expertise, we have grown into a **full-service supplier of professional wound care** products, offering solutions for every working environment: from our classic plasters and bandages for general use to our robust Heavy Duty range and innovative hydrogel-based Burn Care products.

Food - HACCP

We offer the most comprehensive range of blue detectable plasters—both metal and X-ray detectable—and are continuously expanding with innovative solutions. The go-to choice for every professional in the food industry.

Heavy Duty

The black Heavy Duty plasters and cohesive bandages are designed to withstand dirt, grease, and intensive use. A robust choice for professionals in the construction, automotive, and events sectors.

Essential Care

With our skin-colored, non-woven, and transparent plasters and care materials for general applications, we also focus on professional consumers in industry and healthcare.

Burn Care

The Burn Care family provides effective hydrogel-based solutions for fast and gentle cooling of burns. Plasters, gels, and compresses with moisturizing properties that support recovery and promote skin comfort.

More than plasters

In addition to plasters, our range also includes self-adhesive and cohesive bandages, wound spray, hygiene products, burn care products, finger cots, first aid kits, and more.

All our products comply with European MDR 2017/745 and are developed and distributed in accordance with the strictest quality systems such as ISO 9001:2015, HACCP, BRC, and IFS.

Globally recognized

We deliver worldwide through authorized wholesalers and support them with market information, regulations, and promotional materials. Private labeling is possible for certain volumes.

As a manufacturer registered with the FAGG, we place safety, traceability, and quality at the heart of everything we do.

Our products comply with European requirements.:

- European Directive MDR 2017/745 on medical devices
- Biocidal Products Regulation EC 528/2012
- Cosmetics Regulation EC 1223/2009

“ Quality and service are what drive us every day. We do everything we can to deliver the best products quickly and efficiently. With smart, automated systems behind the scenes, you can count on smooth and accurate processing of every order. ”

Wouter Jacobs, CEO

Quality and colors

Different qualities for every application

Detectaplast offers bandages in colors such as blue, black, skin tone, white, and even eco-friendly solutions such as bamboo and cotton.

Each bandage comes in different qualities with specific properties. This allows you to always choose the right bandage for your application, work environment, and comfort needs.

All blue plasters are metal detectable thanks to the detection strip in the plaster. This ensures that a plaster, if lost, is automatically detected by metal detectors in the production line.

In addition, there is a **specific range of plasters that are also X-ray detectable**. These plasters contain a special detection material that is visible on X-ray images. X-ray detection is mainly used in production environments where metal packaging or machines with limited metal sensitivity are used, or where additional control via X-ray inspection is required (e.g., for export or high-risk products).

Name	Backing	Properties	Colors
Waterproof	PE (polyethyleen)	Water-repellent, and skin-friendly	
Superstretch	Elastic textile	Extra stretchable and comfortable. Ideal for moving body parts.	
Superstretch Alu	Elastic textile Aluminum woundpad	Extra stretchable and comfortable. Ideal for moving body parts.	
Waterproof & Superstretch	PU (polyurethaan)	Water-repellent & elastic Antibacterial	
2nd Skin	Ultra-thin PU film	Ultra-thin, waterproof, elastic. Antibacterial. Barely noticeable on the skin.	
Hydrogel	PU (polyurethaan)	Cooling and pain-relieving. Hydrogel pad for grazes and cuts	
Sensitive	Non-woven textile	Soft and comfortable. Stretch. Suitable for sensitive skin	
AquaFlex	TPU (thermoplastic polyurethaan)	Waterproof, flexible & elastic, ultra-thin Discrete, comfortable and strong	
Invisible	Ultra-thin PU film	Waterproof, transparant, breathable. Antibacterial Discrete and barely noticeable on the skin	
Cotton	100% cotton backing	Hypoallergenic, breathable, comfortable Biodegradable	
Bamboo	100% bamboo backing	Hypoallergenic, ultra-thin, flexible Biodegradable

Why blue detectable plasters?

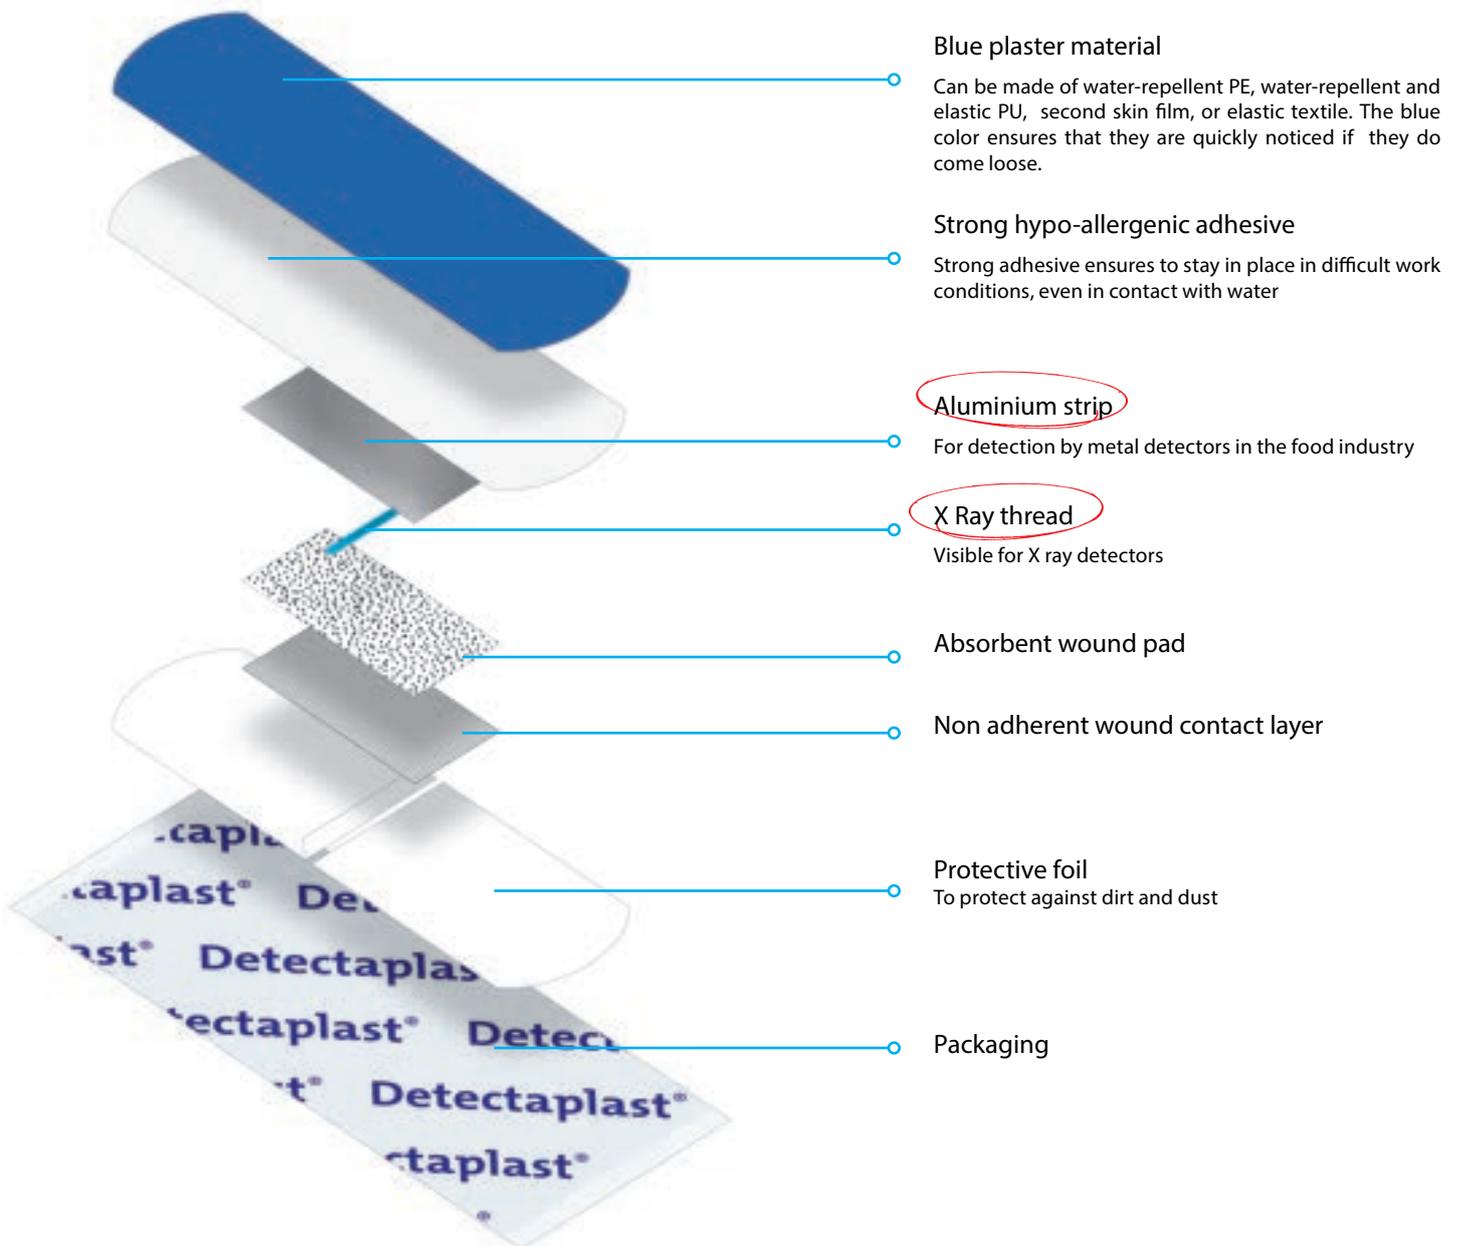

Our blue plasters are specially designed for use in the food industry. Their striking color makes them easy to spot, which is super important for food safety. Plus, they come in metal and X-ray detectable versions, so they can be picked up by detection systems too.

Detectaplast complies with the strictest European guidelines for food safety:

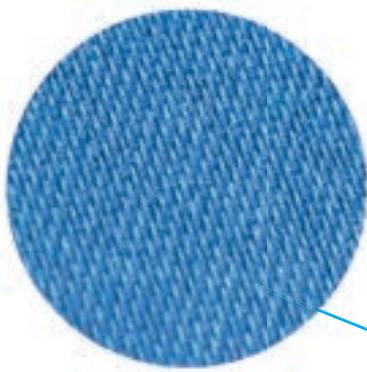

- **HACCP** – risk analysis and control of critical points in the production process
- **IFS** (International Featured Standards) – requirements for food safety and product quality
- **BRC** (British Retail Consortium) – safety, quality, and operational criteria standards

Our plasters help prevent contamination and support a safe production process. This way, we offer peace of mind for both producers and consumers.

Blue metal and X-ray detectable plasters

These plasters contain both a metal and an X-ray detectable element. This means they offer maximum safety, regardless of the type of detection system.

They are ideal for environments where food is packaged in metallic materials such as aluminum foil, cans, or laminated bags, and where standard metal detection may be insufficient.

Available in two qualities:

- Waterproof – for humid or wet working conditions
- Superstretch – for greater comfort and flexibility during frequent movement

Self adhesive bandages

Cohesive bandages with wound pad

Water repellent comfort

- Splash-proof
- Maintains adhesion and functionality
- Fast and reliable fixation

Highly absorbing dressing

- Non-woven dressing
- Absorbs and retains moisture
- Barrier between wound and external factors
- Reduces risk of infection

The cohesive bandage with built-in dressing offers all the advantages of the regular cohesive bandage and provides an all-in-one solution for heavily bleeding wounds or severe wound exudation.

- protection of the wound
- simple application and fixation
- simplified bandage change

Superstretch

Why black?

Black plasters and bandages are the ideal choice for work environments where discretion, dirt resistance, and appearance are important. They are less noticeable on dark or dirty work clothes, mask oil and dust, and look professional.

Perfect for sectors such as construction, automotive, events, and engineering.

Hydrocolloid plaster

Blisters

- made from soft, skin-friendly hydrocolloid material
- forms a gel layer that cushions and protects the blister
- maintains a moist environment to support faster healing
- reduces friction and relieves pressure instantly
- water- and dirt-resistant for optimal protection
- flexible and discreet — feels like a second skin

Although blisters are often small, they can cause a lot of trouble and be very painful.

Due to the constant friction of your shoes and clothing, there is a good chance that your blister will burst, and then the risk of infection is extra high. We offer professional-quality blister plasters for optimal protection.

Self adhesive bandages

Foam bandage beige

- discrete beige color
- self-adhesive, does not stick to skin, hair or wounds
- adheres to wet skin
- grease- and water-repellent
- hemostatic
- tearable, no scissors needed
- latex free, hypo-allergenic
- breathable

Porous structure

- Allows air and moisture to circulate around the wound
- Maintains optimal moisture levels
- Prevents moisture from being trapped
- Reduces risk of infection

Extreme flexibility

- Adapts to the shape of the body
- Maintaining freedom of movement
 - Reduces friction and irritation
 - No restriction of blood circulation

Absorbent capacity

- Useful for moist wounds or wound exudation
- Absorbs excess moisture
- Prevents irritation of the wound

Hygienic aids

Nitrile gloves

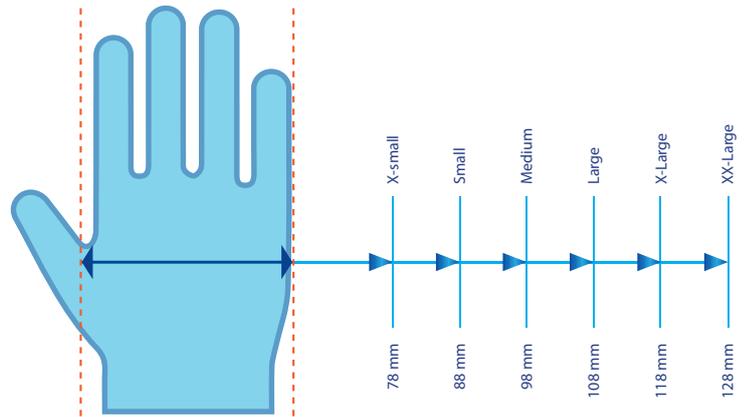

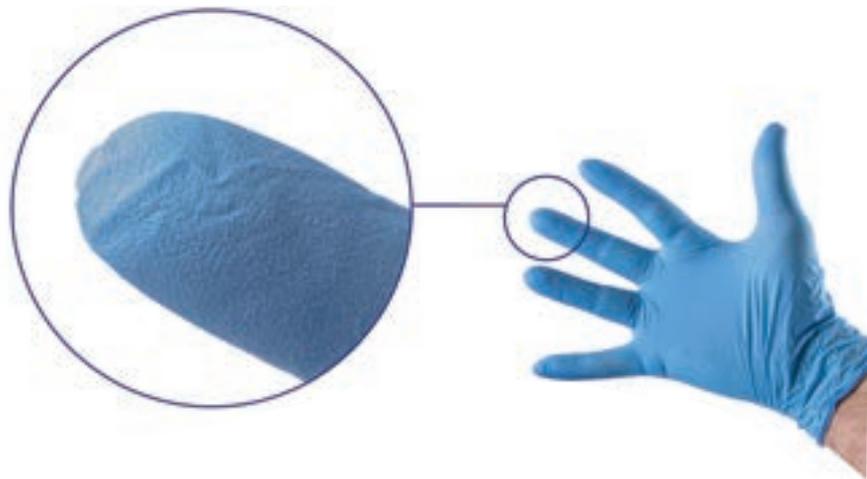

Detectaplast Nitrile gloves are a hygienic tool. Nitrile offers good resistance to various chemicals and protects your hands from oil, bleach and solvents. The fingertips have a roughened, anti-slip finish. Not only are the gloves strong and rugged, they offer excellent tactile sensitivity for all types of work. They are resistant to pressure and stretching, lightweight and comfortable. The anti-allergic gloves are completely latex-free and made of 100% resistant nitrile. Suitable for allergy sufferers and those with sensitive hands.

Nitrile is the synthetic alternative to latex gloves.

Detectaplast Nitrile gloves are suitable for food industry, medical applications, industry, beauty sector, etc

- super strong quality of 4.0 Mill.
- good dexterity (textured fingertips)
- resistant to pressure and stretching
- anti-allergenic
- 100% latex free
- available in XS - S - M - L - XL - XXL

Eye wash

Eye wash NaCl 0,9%

Sterile rinsing solution based on 0.9% sodium chloride (physiological saline), **suitable for rinsing the eye in case of contamination by dust, dirt, or foreign substances**. Often used as a supplement to buffered eye wash solutions.

- sterile, ready-to-use solution (0.9% NaCl)
- for single use – hygienic and safe
- suitable for removing dust, dirt, or foreign substances
- gentle on eye tissue – no preservatives
- can be used after rinsing with buffered solutions (such as BioPhos®74)

NaCl 0,9% - references

5340	bottle 100 ml	1 x

Eye Wash BioPhos® 74

BioPhos®74 is a sterile, buffered eye rinse solution designed for **rapid neutralization of acids and alkalis in the event of chemical burns**. Its high buffer capacity and physiological pH of 7.4 help prevent irreversible cell damage while being gentle on eye tissue. It is an essential supplement to stationary eye showers in high-risk environments.

- fast neutralisation of acids and alkalis thanks to high buffer capacity
- pH-neutral (7.4), aligned with the natural electrolyte balance
- free from preservatives and foreign substances
- minimises cell damage after rinsing
- ergonomic eyewash nozzle
- sterile 250 ml bottle, ready for immediate use
- for first aid in case of chemical eye injuries (liquid, gas or solid)
- ideal for industry, laboratories, emergency services, transport & safety
- rinsing afterwards with 0.9% NaCl is recommended
